

App. No. 10/707,548

In the Claims:

Cancel Claims 1-20

21. (new) A device comprising: a container with a movable platform, where said movable bottom moves the contents of said device up and down, which a flexible liner with said container, where said container has an inner wall and an outer wall and where said movable platform is the same shape, is perpendicular to and fits within the inner wall, with a spring positioned between said movable platform and the bottom of said container and where said spring is counter balanced to the force of the contents of said container so that said movable platform moves up as the contents are removed.
22. (new) A device as in claim 21 in which said container is used for food products.
23. (new) A device as in claim 21 in which said container is a jar.
24. (new) A device as in claim 21 in which said container has an inner wall with a plurality of wedges attached to said inner wall.
